

CLAIMS

What is claimed is:

1. A torch cover comprising:

5 a generally cylindrical outer housing closed at the upper end by an upper housing cover opposite an entry orifice at the lower end;

a circumscribing conduit formed about the lower circumference of the outer housing near the entry orifice and having a conduit entry; and

10 a drawstring entering and exiting said conduit entry in a manner such as to entirely circumscribe the lower portion of the cylindrical outer housing.

2. The torch cover of Claim 1, wherein an internal retention volume formed within said housing 20 is approximately 10" wide and 12" long.

15 3. The torch cover of Claim 1, wherein said upper housing cover is formed of light impenetrable material.

4. The torch cover of Claim 1, wherein said cylindrical outer housing is formed of light impenetrable material.
